Martech professional with experience spanning the full customer journey. From technical, data-led foundations to consumer growth and platform strategy. Skilled in evaluating and selecting marketing technology platforms (CDPs, analytics, subscription and paywall systems), designing journey and measurement frameworks, and applying experimentation and behavioural analytics to drive acquisition, engagement and revenue growth.

EXPERIENCE

In Digital Marketing | Manager, Experimentation & Analytics

JAN 2024 – PRESENT

Agency role covering strategy, analytics, experimentation, lifecycle optimisation and tech stack selection, implementation and management

Financial Times (Secondment) | Performance Optimisation Manager

- **Led experimentation strategy** for the AI-powered paywall, using audience personalisation, behavioural analytics and testing to optimise acquisition, engagement and monetisation, with customer lifetime value (LTV) as the primary success metric.
- **Owned commercial performance** across the paywall portfolio, translating audience and conversion data into experimentation roadmaps that maximised subscriber conversion, retention and long-term revenue across acquisition channels.
- **Built reporting frameworks and dashboards** in Amplitude and Looker to monitor business performance, forecast outcomes and support data-driven decision-making among senior stakeholders.
- **Served as trading and business performance owner** for the paywall portfolio, partnering with Product, CRM, Data Science and BI teams to align experimentation with commercial objectives and ensure delivery against revenue KPIs.
- **Represented the Experimentation team** within the FT's Younger Audience initiative, helping shape strategies to increase social-to-web engagement, habituality and subscriber growth among younger cohorts.
- **Ran analysis and testing on dynamic LTV inputs** within the AI-powered paywall, examining how changes in customer lifetime value influenced the model's access and pricing decisioning, sharpening AI-driven personalisation and monetisation outcomes to avoid model drift.

In Digital (Agency) | Core Role

- **Led a vendor RFP programme** for a client's subscription and paywall platform, owning the end-to-end customer relationship. Defining requirements and building roadmaps and timelines, to coordinating vendor demos, managing procurement and conducting hands-on website audits to inform final platform selection.
- **Advised clients on platform and analytics tooling** for onsite journeys and CDP integrations. Mapping end-to-end user journeys and aligning tracking to a broader measurement framework that supported business and marketing goals.
- **Evaluated AI-powered paywall vendors**, helping clients understand the underlying models and how AI capabilities could be applied to drive specific business outcomes, translating technical differences into clear business trade-offs.
- **Developed audience growth strategies** for leading media brands including Financial Times, News UK, Future and The Independent, using audience insight, segmentation and experimentation to drive engagement and retention across social (TikTok, Instagram, Facebook) and digital channels, including targeted initiatives to grow younger audience cohorts.
- **Designed and executed 3+ A/B and multivariate tests per month** across web, app and social-driven journeys using platforms including Zephra, Piano VX, Optimizely, Purchasely and MonetisationOS. Troubleshooting tracking and implementation issues to ensure test validity, and improving conversion by up to **40%** through performance-led optimisation.
- **Built LTV and product-mix models** for clients including a registered-user LTV model to understand net gain between registration wall outperformed ad revenue, and analysis identifying the optimal blend of products to maximise overall client revenue.
- **Awarded Best Use of Data** (Marketing Awards 2025) for contribution to Financial Times first-party data and experimentation strategy.

Smartology | Account Manager

JAN 2023 – JAN 2024

- **Managed programmatic display campaigns** across multiple industries, acting as a trusted strategic partner to senior clients; translated CPC, CTR and STR data via Google Analytics and Grafana into recommendations that improved ROI.

EDUCATION

University of Nottingham

SEP 2019 – JUN 2022

Bachelor of Engineering (Chemical Engineering) | Second-class honours, upper division (2:1)

Mill Hill County High School

SEP 2017 – JUN 2019

A Level | AAB in Mathematics, Chemistry and English Literature respectively
